

## Homework 1

\*Submit your .dwg file to Canvas for submission. No .PDF file is required for this homework.

Ensure that you have AutoCAD 2015 installed on your computer. This is only if you want to have AutoCAD on your personal computer. The computer lab in the basement of More Hall has a room full of computers and is available to you (as long as you request access from the computer lab technician beforehand), each with AutoCAD 2015 installed and configured properly.

In the Week 1 Module, click on the "Install Service Packs" Page link to download the appropriate service packs and add-ons for Windows or Mac, prior to starting your homework.

**Problem 1:** Draw the figure as shown below. Do not include dimensions lines. Notice that those are diameter symbols with a diameter of 2 units for each of those circles.
